

## Digital Story Telling

1. Click on windows movie maker.
2. To import files click **import pictures**.
3. Drag and drop your pictures into the story board squares.
4. To add words click on **make titles and credits**.
5. To make a title click on **make titles and credits**. Then click on **add title to the beginning**. A box will show up where you can add words. Go down to **more options** at the bottom. **Click on change the title animation**. Choose what you would like. To change the font and color click on that option.
6. To add **video effects** you must first have a picture in the box. When the picture is in the box, then a little square will show up. You can drag whatever effect you would like from the choices into that little box.
7. To transition between pictures (the small square between the two) go to **view video transitions**. Drag the transitions to the boxes. You can do whichever one you want each time.
8. **FYI-** The **show story board** allows you to drag your pictures and put them in the correct spot. The **show timeline** allows you to watch your movie.
9. **FYI-** Each time you want to add words the presentation of those words will stay the same unless you change the title animation each time to what you want.
10. To import music click on **import audio or music**.
11. You can choose as many different kinds of music as you would like.
12. You have your story on **show timeline mode** when importing music.

**13.** To **Save** your file to your flash drive click on **file**. Click on **save file as**. Save the file where you would like it.

**Copyright issues:** If you are posting anything online you can not use music without permission.

If you are not posting it online, you must just credit the musician.
